

Registration Form for WFC Scientific Committee

Personal Info.

Name: Liu Jiguang

Title: Professor

Affiliation: Hefei University of Technology

Research Interest

Foundry process and equipment including digital precision casting technology and Production line equipment.

Main Achievements (<200 words)

Presided over the completion of "Nine•Five" and "Eleven•Five" national major science and technology research projects, 2017 Anhui Province major science and technology research projects, successfully presided over the German HWS company static pressure moulding line cooperation production and promotion projects, presided over the completion of the "large-scale thin-wall digital precision casting complete production line" research and development and application project", a total of more than 20 scientific research projects. More than 30 national patents were declared and 20 patents were authorized. Published more than 20 academic papers and presided over the revision of 3 foundry machinery industry standards. Won the Outstanding individual Award of "Nine•Five" National Major scientific and technological Research projects of four ministries and commissions, including the Ministry of Science and Technology.
